Sameer Awaji

Frontend Developer | Next.js | React | Supabase

Manila, Philippines | sameer2study@gmail.com | github.com/SameerAwaji | LinkedIn

Summary

Frontend developer with a background in product management and digital marketing. I rebuilt a marketing agency site in Next.js and took the Lighthouse score from 77 to a perfect 100, cutting load time from 4.8s to 0.8s. I work best with founders and small teams who need someone who can both think through the product and build it. Fluent in Arabic and English.

Technical Skills

Frontend: React, Next.js, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3

Backend & Data: Supabase, Node.js, API integrations

Tools: Vercel, Git, GitHub, Figma, Adobe XD, AI-assisted development (Cursor, Claude)

Other: Web performance optimization, SEO, Agile, Product Management

Experience

Frontend Developer — MIP Marketing Agency 2024 – 2025

mipksa.com

- Rebuilt the company website from scratch in Next.js for a full frontend refresh and SEO boost
- Improved Lighthouse performance score from 77 to 100 while handling multiple high-resolution images
- Reduced Largest Contentful Paint (LCP) from 4.8s to 0.8s — an 83% improvement in load time

Web Developer — Maeen 2024 – 2025

maeen.com.sa

- Built the full website from an Adobe XD design using React and Supabase
- Implemented contact forms with Supabase database integration
- Built an internal task management dashboard with progress tracking and milestone views for 60+ users
- Managed stakeholder requirements directly and iterated based on feedback

Product Manager Intern — Nana (Online Grocery Delivery) Feb 2025 – Apr 2025

- Led development of customer engagement features including affiliate coupon systems and gamification
- Collaborated with design, development, and marketing teams on AI-optimized product documentation
- Conducted competitor analysis and user acceptance testing to align features with market needs

Education

Bachelor of Software Engineering — University of Jeddah 2024

- GPA: 4.48 / 5.0
- Core focus: web development, algorithms, and software architecture
